## Education

**Dr. A. P. J. Abdul Kalam Technical University, Lucknow**, Computer Science Sept 2020 – May 2024  
• GPA: 7.3/10 ()

## Experience

**Nextjs Developer**, Dietghar Working  
• Project Leadership – Developed the company's main website and a fully functional admin panel, ensuring scalability and efficiency.  
• Performance Optimization – Implemented server-side fetching and advanced algorithms, reducing loading time to almost 50%, for a seamless user experience.

**Reactjs**, Test Buddy Aug 2024 – December 2024  
• Executed seamless incorporation of RESTful services into existing web applications, elevating response accuracy levels through improved synchronization processes which resulted in loading efficiency under 2  
• Resolved API response handling and optimized website performance, reducing load times by 25%, leading to a more efficient and responsive test-conducting platform.  
• Performed a secure payment gateway into the web, enhancing transaction flow by 20% and ensuring 99.9% reliability for seamless payment processing..

**Full Stack Developer**, Artsy Technologies July 2024 – Dec 2024  
• Database Modeling & Integration – Implemented optimized database modeling, ensuring seamless integration and smooth functionality between front-end, back-end, and database.  
• Full-Stack Web Development – Designed and developed a school website with front-end and back-end, ensuring a user-friendly interface and efficient logic.

## Projects

**E-Commerce Website Development** [github.com/05-rahul-vishwakarma/ecommerce](https://github.com/05-rahul-vishwakarma/ecommerce)  
• E-Commerce Website Development – Developed a fully functional eCommerce platform for a client, implementing custom features like product catalog, shopping cart, and secure payment gateway integration.  
• Client Collaboration – Worked closely with the client to understand requirements, design the UI, and ensure seamless user experience and back-end performance.

**Football Betting Application** [github.com/05-rahul-vishwakarma/NextFootball](https://github.com/05-rahul-vishwakarma/NextFootball)  
• Implemented an engaging football betting platform with detailed match stats and Framer Motion animations, boosting user interaction by 40% and extending session duration to 25 minutes.  
• Implemented an engaging football betting platform with detailed match stats and Framer Motion animations, boosting user interaction by 40

## Technologies

**Front-End:** Next.js, React.js, React-Native, TailWindCSS, material ui, Framer-Motion, Context-API, JavaScript, Zustand, Acternity Ui, Schdcn Ui

**Back-End:** Node.js, Express.js, MongoDB, Mongoose, REST-API

**Others:** Git, Github, Vercel, Render
